

# I'm a Kahu mālama 'aina

(Guardian of the land)  
I help protect our 'aina from  
plastic bag litter.

- 1) I use this reusable bag made from recycled plastic, when convenient and possible;
- 2) I reuse plastic bags when possible;
- 3) When disposing of plastic bags, I tie them into a knot so they won't fly away.

Did you know that plastics  
can be turned into electricity,  
and that plastics can generate  
more energy per pound (BTUs) than coal!
